FEATURING

Dr. Jon Solberg

North Dakota's own team physician joins us after the film for a scholar-led leadership conversation.

In spring 2018, seven men set out to cross the Greenland Ice Sheet by vehicle, south to north — 1,400 roadless miles never before crossed. *Expedition: Greenland* is the record of that journey and the trust it took to survive it, with North Dakota's own Dr. Jon Solberg serving as the team's physician.

After the film: a scholar-led leadership session with Dr. Solberg on the judgment, humility, and resolve extreme circumstances demand — on the ice or closer to home.
